

GNG Play

For a child to reach their full potential there is nothing more important than ensuring that they are given the right tools for development, through both learning and play. Both parents and teachers are aware of the importance of physical activity as a vital part of a child's well being.

At GNG Play we have developed a fun and exciting range of indoor and outdoor soft play equipment, perfect for at home, nurseries, schools or play groups. Not only are our products designed to provide children with the essential physical activity that is often lacking in today's digital age, but they are also designed to improve their all round development through balancing and climbing, which benefits their motor skills, spatial awareness and interaction with other children.

Our range consists of foam filled soft play items manufactured here in the UK using wipe clean durable flame retardant PVC and high grade CFC-free flame retardant foam. All our designs are printed with non-toxic ink.

With years of development and expertise behind us, we offer a wide selection of products to trade customers, as well as offering the products white label for key accounts, where we can also offer bespoke designs to meet our client's unique specifications. Within the range we supply the following types of soft play products:

- Climb and slide
- Rockers
- Shapes: Blocks, cylinders and beams
- Play mats
- Learning: numeracy and literacy
- Ball pools
- Fun seating
